# PAUL BOS HEAT TREAT

# PAUL BOS

### **HEAT TREAT**

Heat treat could best be called "temperature treating" since Buck uses a system of hot and cold to get the most from the steel. This system was pioneered by Paul Bos, whose heat treating formulas have proven to be the best in the business. Each blade is tempered to the appropriate Rockwell hardness through a heating, freezing and reheating system that defines the properties desired from the steel.

"Paul Bos dedicated over five decades to dialing in and perfecting our heat treat process. The proper heat treat is critical to ensure the best balance between hardness for edge retention, ductility and strength for rugged use, and optimization for corrosion resistance. We still rely on Paul's expertise today and religiously follow the time-tested formulas he pioneered."

-CJ Buck CEO and Chairman, Buck Knives

# **BUCK'S STEEL TYPES**

In 1902, when Hoyt Buck was looking for a better way to temper steel and created the first Buck knife, he didn't realize he was paving the way for his family to become the most famous name in knives. Today, an industry leader in edge retention and famous for exceptional quality, Buck Knives creates each knife by strictly following these practices.

### STEEL SELECTION

Steel is more than a number. Each steel used by Buck has unique properties which we match to the intended use of the product.

CPM S45VN is a martensitic stainless steel designed to offer improved corrosion and wear resistance over other leading steels. The CPM (Crucible Particle Metallurgy) process produces a very uniform, high-quality steel defined by supreme stability, grindability and toughness compared to those produced by other melting practices. The chemical components in S45VN utilize niobium and nitrogen in place of some of the vanadium and carbon to provide an excellent combination of edge retention, wear resistance, corrosion resistance, and toughness. These properties make it a solid choice for blades intended for heavy use, such as an everyday carry or work knife.

### Rc 59-61

CPM S35VN is a martensitic stainless steel created to provide improved toughness over CPM S30V. The chemical makeup is balanced to form some niobium carbides along with vanadium and chromium carbides, making CPM S35VN about 15-20% tougher than CPM S30V without any loss of wear resistance. This increased toughness helps prevent edge chipping, as both vanadium and niobium carbides are harder and more effective in providing wear resistance. As with both S35VN and S45VN steel, the CPM process produces a uniform, high-quality steel characterized by superior stability, grindability and toughness compared to steels produced by other melting practices. A premier hunting steel, it would be appropriate for the big game hunter or guide who intends to field dress multiple animals.

### Rc 59-61

Small grain structure with a high carbon content has allowed this powdered steel to become the industry standard by which other super steels are compared. With our BOS heat treat process, the Rc 59-61 steel outperforms other steels in edge retention, ductility, and wear resistance. This steel takes a beating and holds an edge for a long time. The properties that allow it to hold an edge also slow the sharpening process. S30V is perfect for somebody seeking a high-performance blade, but does not want to have to sharpen in the field.

### Rc 59-61

A popular steel for knives, USA-made 154CM is a modification of 440C where molybdenum has been added. Sporting greater corrosion resistance, wear resistance, better edge retention, and higher achievable Rockwell hardness than 440C. 154CM's combination of sought-after traits and attainable price point in the market make this an excellent choice in pocket knives where edge retention and ease of sharpening in the field matter.

### Rc 58-62

This martensitic stainless steel with its hardness at a Rc of 58-60 results in a good balance between edge retention, amazing corrosion resistance, and ease of resharpening. This steel is a good choice for every kind of knife from hunting and everyday carry, to kitchen cutlery. This high-value steel will live through years of service and edge maintenance.

### Rc 58-60

This high carbon spring steel is a good choice for applications that require impact loads and extreme bending. At a Rc 57-58, the steel is not brittle. It will bend and flex back to its original shape while still remaining hard enough for good edge retention.

Rc 57-58

# WHY LEGACY?

For generations, the Buck name has stood for quality materials, craftsmanship, and a steadfast adherence to the needs of our customers.

Our legacy collection is a culmination of everything we do, with models that have proven themselves to be winners, and materials to add that extra touch.

These limited editions are only available during the 2023 calendar year, so secure your legacy before they are gone.

# THE 590 PARADIGM®

Raindrop pattern Damascus steel and elegant ivory G10 with DLC coated bolsters make this Legacy edition 590 Paradigm® a sight to behold.

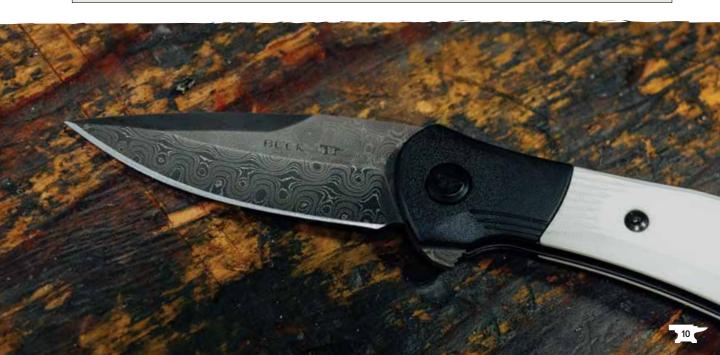

**BLADE** Drop point, raindrop Damascus steel | **LENGTH** 3.00" (7.60 cm) | **THICKNESS** 0.120" (0.305 cm) | **CLOSED** 4.50" (11.43 cm) | **WEIGHT** 4.85 oz (137.00 g)

HANDLE Ivory G10 and DLC coated bolster

CLIP DLC coated, deep carry, tip-up, reversible

BOX MODEL 0590IVSLE-B CATALOG 13518

# THE 532 BUCKLOCK®

The Bucklock® is back for 2023 with this Legacy release. Featuring copper scales with fine file work accents, and smooth black micarta scales.

BLADE Drop point, 154CM steel | LENGTH 3.00" (7.62 cm) | THICKNESS 0.110" (0.279 cm) | CLOSED 4.375" (11.11 cm) | WEIGHT 4.16 oz (118.00 g)

HANDLE Polished copper with spine file work and micarta scales

SHEATH Gray distressed leather, made in the USA, from original 1992 tooling

BOX MODEL 0532BKSLE-B CATALOG 13529

# THE TITANIUM 110 SLIM PRO TRX

Spiced up for 2023, the 110 Slim Pro TRX has dawned it's bead-blasted titanium scales and bronze fasteners. The S45VN steel blade keeps the premium material motif going to create an excellent-looking and fully capable workhorse of a knife.

BLADE Modified clip, \$45VN steel | LENGTH 3.75" (9.53 cm) | THICKNESS 0.120" (0.305 cm) | CLOSED 4.88" (12.40 cm) | WEIGHT 4.80 oz (136.00 g)

HANDLE Bead-blasted titanium with bronze PVD fasteners | CLIP Deep carry, removable, reversible, coated stainless steel | FEATURES Black thumbstuds

BOX MODEL 0110GYSLE1-B CATALOG 13519

# THE 192 VANGUARD®

For 2023, the Vanguard® gets an upgrade in steel to S35VN and is wrapped in polished green canvas micarta handles, all topped off with a high-polish nickel silver bolster and guard.

HANDLE Polished nickel silver and green canvas micarta SHEATH Black leather, imported

BOX MODEL 0192GRSLE-B CATALOG 13528

# THE 110 FOLDING HUNTER®

This nickel silver barehead 110 Folding Hunter\* is a sight to behold. With an S45VN, drop point blade and beautiful black and brown layered, scalloped Richlite handles, this 110 is aiming for a top spot in your EDC rotation.

**BLADE** Drop point, S45VN steel | **LENGTH** 3.75" (9.53 cm) | **THICKNESS** 0.120" (0.305 cm) |

**CLOSED** 5.00" (12.70 cm) **WEIGHT** 6.03 oz (171.00 g)

HANDLE Nickel silver barehead bolster with scalloped black and brown Richlite

SHEATH Black leather, imported

BOX MODEL 0110BKSLE-B CATALOG 13530

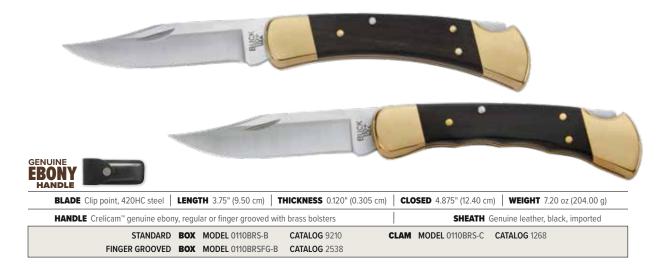

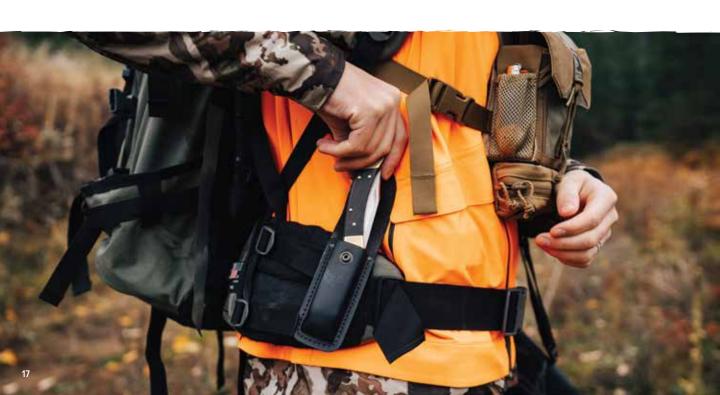

# THE FAMOUS 110

For nearly 60 years, the Buck 110 Folding Hunter® has been a loyal companion to those who demand the best.

With millions sold, this highly-imitated-but-never-duplicated knife still hold the #1 spot in our lineup to this day. Also available in a push-button automatic design.

# THE ALPHA™

New in the lineup for 2023 is the 662 and 664 Alpha™ series. Designed for hunters looking for a blade that can do it all, the Alpha combines high-performance S35VN steel with a solid, high-ground blade shape designed to move easily through material without bunching. Jimping along the blade spines makes it easy to choke-up on the blade for those tricky blind cuts. The textured handles provide a strong positive grip even with things get wet. Available in two sizes and a genuine leather sheath, this Alpha deserves a spot in your pack.

## THE PARADIGM'S SHIFT MECHANISM

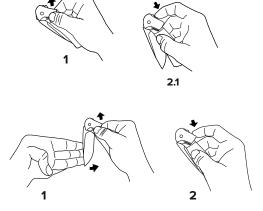

Our patented Shift Mechanism<sup>®</sup> serves as an advanced locking and safety mechanism. It not only locks the blade open when extended, but also prevents accidental opening when the blade is closed. Now utilized on an automatic model, a slight glide of the bolster will instantly open the 591 Paradigm<sup>®</sup> Shift. For the 590 assisted opening model, a slide of the bolster and a quick flick of the finger works with our patented ASAP opening technology to quickly engage the blade.

#### **TO OPEN**

- Place your thumb on the ridged portion of the bolster and push up (counter-clockwise).
- 2. **591 Automatic Version** The blade will instantly deploy. Then close the bolster to lock the blade open.
- 2.1 590 ASAP Version Move your thumb off the bolster, then use your index finger to pull the blade flipper down to start opening the blade. When the ASAP technology has completed opening the blade, be sure the bolster is closed and the blade is locked.

#### **TO CLOSE**

- Place your thumb on the ridged portion of the rotating bolster and push up (counter-clockwise). With your other hand rotate the blade fully closed.
- 2. Toggle the bolster down (clockwise) to lock the blade closed.

#### 591 **PARADIGM® SHIFT**

The sale of automatic knives is federally regulated. See page 82 for details.

Certain utility and design patents issued to Buck Knives are noted, however, Buck Knives holds additional patents pending, design and utility patents both domestic and foreign on products in this catalog. All trademarks indicated are owned and/or registered by Buck Knives, Inc. except as follows: Dynaflex and Versaflex are a registered trademarks of Polyone Corp.; Micarta is a registered trademark of Industrial Laminates/Norplex, Inc.; Mossy Oak, Mossy Oak Break-Up COUNTRY and Mossy Oak Blaze are registered trademarks of Haas Outdoors, Ind.; FlipStik and JewelStik are registered trademarks of Hewlett Manufacturing; Cerakote is a registered trademark of NIC Industries, Inc. an Oregon corporation; DymaLux is a registered trademark of Cousineau Wood Products of Maine, LLC.

Knife laws and regulations can vary significantly from location to location. As such, certain styles, sizes and blades may not be permitted in certain locations and areas. Buck Knives produces many different types of knives for a wide variety of legitimate everyday use. However, due to the complex and ever changing nature of knife laws and regulations, it is not possible for Buck Knives to be aware of specific prohibitions in areas where its knives may be purchased, carried or used. It is the responsibility of the buyer/user to investigate, understand and comply with any and all laws and regulations that may apply to his or her area. The buyer/user is solely responsible for any claims arising from violations of these laws or regulations or any unintended use or misuse of the product

The sale of automatic knives is federally regulated. Always check permissibility within your state or locality as non-federal personnel may be precluded from ownership or use by state laws. NO EXCEPTIONS WILL BE MADE. Purchase of automatic knives must be preceded by the submission of an Automatic Knife Acknowledgement Form. Shipping of Automatic Knives: All returns of automatic knives must be shipped by the U.S. Postal Service. All returns of automatic knives must be shipped via common courier as well, and not by the U.S. Postal Service. Our policy requires that all automatic knives require a signed Automatic Knife Acknowledgement Form.
